

Dr. Yuan Ji is Professor of Biostatistics at The University of Chicago. His research focuses on innovative Bayesian statistical methods for translational cancer research. Dr. Ji is author of over 170 publications in peer-reviewed journals including across medical and statistical journals. He is the inventor of many innovative Bayesian adaptive designs such as the mTPI and i3+3 designs, which have been widely applied in dose-finding clinical trials worldwide. His work on cancer genomics has been reported by a large number of media outlets in 2015. He received Mitchell Prize in 2015 by the International Society for Bayesian Analysis. He is an elected fellow of the American Statistical Association, and the Chair of the Biopharm section of the International Society of Bayesian Analysis. The information about Dr. Yuan Ji's research can be found on the website <https://ccte.uchicago.edu/> and <https://scholar.google.com/citations?user=HiPsZPgAAAAJ&hl=en>.
